

PATIENT NAME	Chetan Kumar	DATE	10-Jan-2011
REF. BY DR.	YOJANA GOKHALE	SEX / AGE	Female 9 Years
COLLECTION CENTRE	Hospital	LAB NO.	118

EXAMINATION OF BLOOD FOR HIV I & II

<u>TEST</u>	<u>RESULT</u>
<u>HIV I & II</u>	
HIV I	Negative
HIV II	Negative
Method	Spot Test - Tri Dot

Interpretation : This is only a screening test. Presence of antibodies against HIV I & II does not mean disease and it's presence or absence has to be confirmed by Western Blot Technique.
